I N T R O D U C T I O N

LCS Deathmatch is a League of Legends-style management game. It was designed with the intention of allowing users to have their own players and teams competing for the Summoner's Cup.

The game is for those aged 13 or above due to the actual game having the same age restriction.

However this game is open to all ages as it is just a simulated version.

Users can create their own teams, sign their own players, and have them face off in a 20-40 second match. (Each second represents one minute)

I N T R O D U C T I O N

Our target audience are League of Legends fans who wish to compete in the LCS or act as a game manager.

This project will be appealing to those who like simulation games. Also for those who do not have the luxury of time to play real League of Legends because games usually last over 30 minutes.
